

CLEANROOMS

EUROPEAN CLEANROOMS CONSTRUCTION MARKET LEADER

“

For more than 30 years, we have been **designing, installing, commissioning,** and managing **energy efficiency** in controlled atmosphere zones for the Healthcare, Microelectronics, Cosmetics and Aerospace industry sectors. Our engineers and technicians can complete all of the design phases necessary for fully optimised cleanroom and laboratory projects. Our objective is to produce detailed designs which will allow us to commit fully to the completion of your projects.

We apply the high value technical skills of our in-house staff so that we can meet the deadlines, quality standards and safety requirements that will allow us to guarantee the high performance and sustainability of your installations. With our integrated project management offer we can also provide clients with turnkey solutions.

We have all of the areas of expertise necessary for **Cleanrooms projects** from the exterior shell to the interior furniture

OUR GUARANTEES

- Qualified in-house professionals with significant “**Clean-Build**” experience, covering all of the domains involved, from project management to construction.
- Proven “agile” construction and commissioning methodologies.
- Services designed specifically to support you in the completion of your location research, existing building renovation and clean room renovation projects.

”

OUR SKILLS

Technical sectors: HVAC, specific fluids and gases, energy, clean utilities, HV/ LV/ HC, LC electricity, fire alarms, FSS, BMS, EMS...

Access roads and utilities, main build, base build, structure

High Quality Environmental Standard

Finishing works, clean rooms, dry rooms (ISO 5, 6, 7, 8 NC/ Class A, B, C, D...)

Commissioning procedure, clean room classification and certification

conceptUEL
CAP INGELEC

Our subsidiary ConceptUEL is an engineering company specialised in the design of industrial and controlled environments: cleanrooms, production lines, laboratories, etc. We are therefore strengthening our

OUR ADDED VALUE

Our expertise allows us to propose a service covering all of the design/construction needs of your projects. Where necessary, we can also intervene in a more specialised manner within the “Clean- Concept” scope.

Our added value :

- **«TIME» & «COST»** commitment
- **«SAFE»** approaches with clear identification of work zones and priority zones
- **«LEAN»** deliveries with detailed logistics schedules in place before the start of the works
- Daily and fully documented **«AGILE»** meetings during the works phase
- **«CLEAN»** approach from the design phase onward

skills in this field. With a strong culture of customer satisfaction, ConceptUEL positions itself as a real partner to ensure the success of projects.

Cap Ingelec's assets

30 years of technical expertise.
French market leader in engineering and energy efficiency.
An attractive set of Turnkey solution proposals.
International intervention scope.
Deadline, cost, quality and safety management.
